Engineering Intelligent Industrial Enterprises

Who We Are

DHGsoft is a technology-driven industrial transformation company delivering advanced engineering, automation, Industry 4.0, and digital manufacturing solutions for modern industrial enterprises.

We help organizations modernize operations by integrating engineering excellence, industrial automation, IIoT connectivity, AI-driven analytics, and enterprise intelligence into a unified smart manufacturing ecosystem.

Transforming Industries Through Engineering & Intelligence

One Company. Complete Solutions. From Concept to Commissioning.

Our Expertise

Industrial Automation & Digitalization

Smart Manufacturing & Industry 4.0

Electrical & Instrumentation Engineering

Industrial Networking & IIoT

EPC & Project Execution

AI-Based Operational Intelligence

End-to-End Plant Integration

Industrial Product Supply & Services

Industries We Serve

Tailored Digital Transformation Across Diverse Operational Landscapes.

Oil & Gas

Pharmaceutical

FMCG

**Power &
Utilities**

**MMM
(Metals, Mining,
Minerals)**

Chemicals

**Food &
Beverage**

**Water &
Wastewater**

Manufacturing

**Infrastructure &
Data Centres**

Our Vision

To become a globally trusted industrial technology partner enabling intelligent, connected, and sustainable manufacturing ecosystems.

Our Mission

- Deliver reliable and scalable industrial solutions
- Bridge OT and IT ecosystems seamlessly
- Empower industries with data-driven decision making
- Enhance operational efficiency and plant reliability
- Accelerate Industry 4.0 adoption through innovation

Core Values

Innovation

Reliability

Customer Success

Engineering Excellence

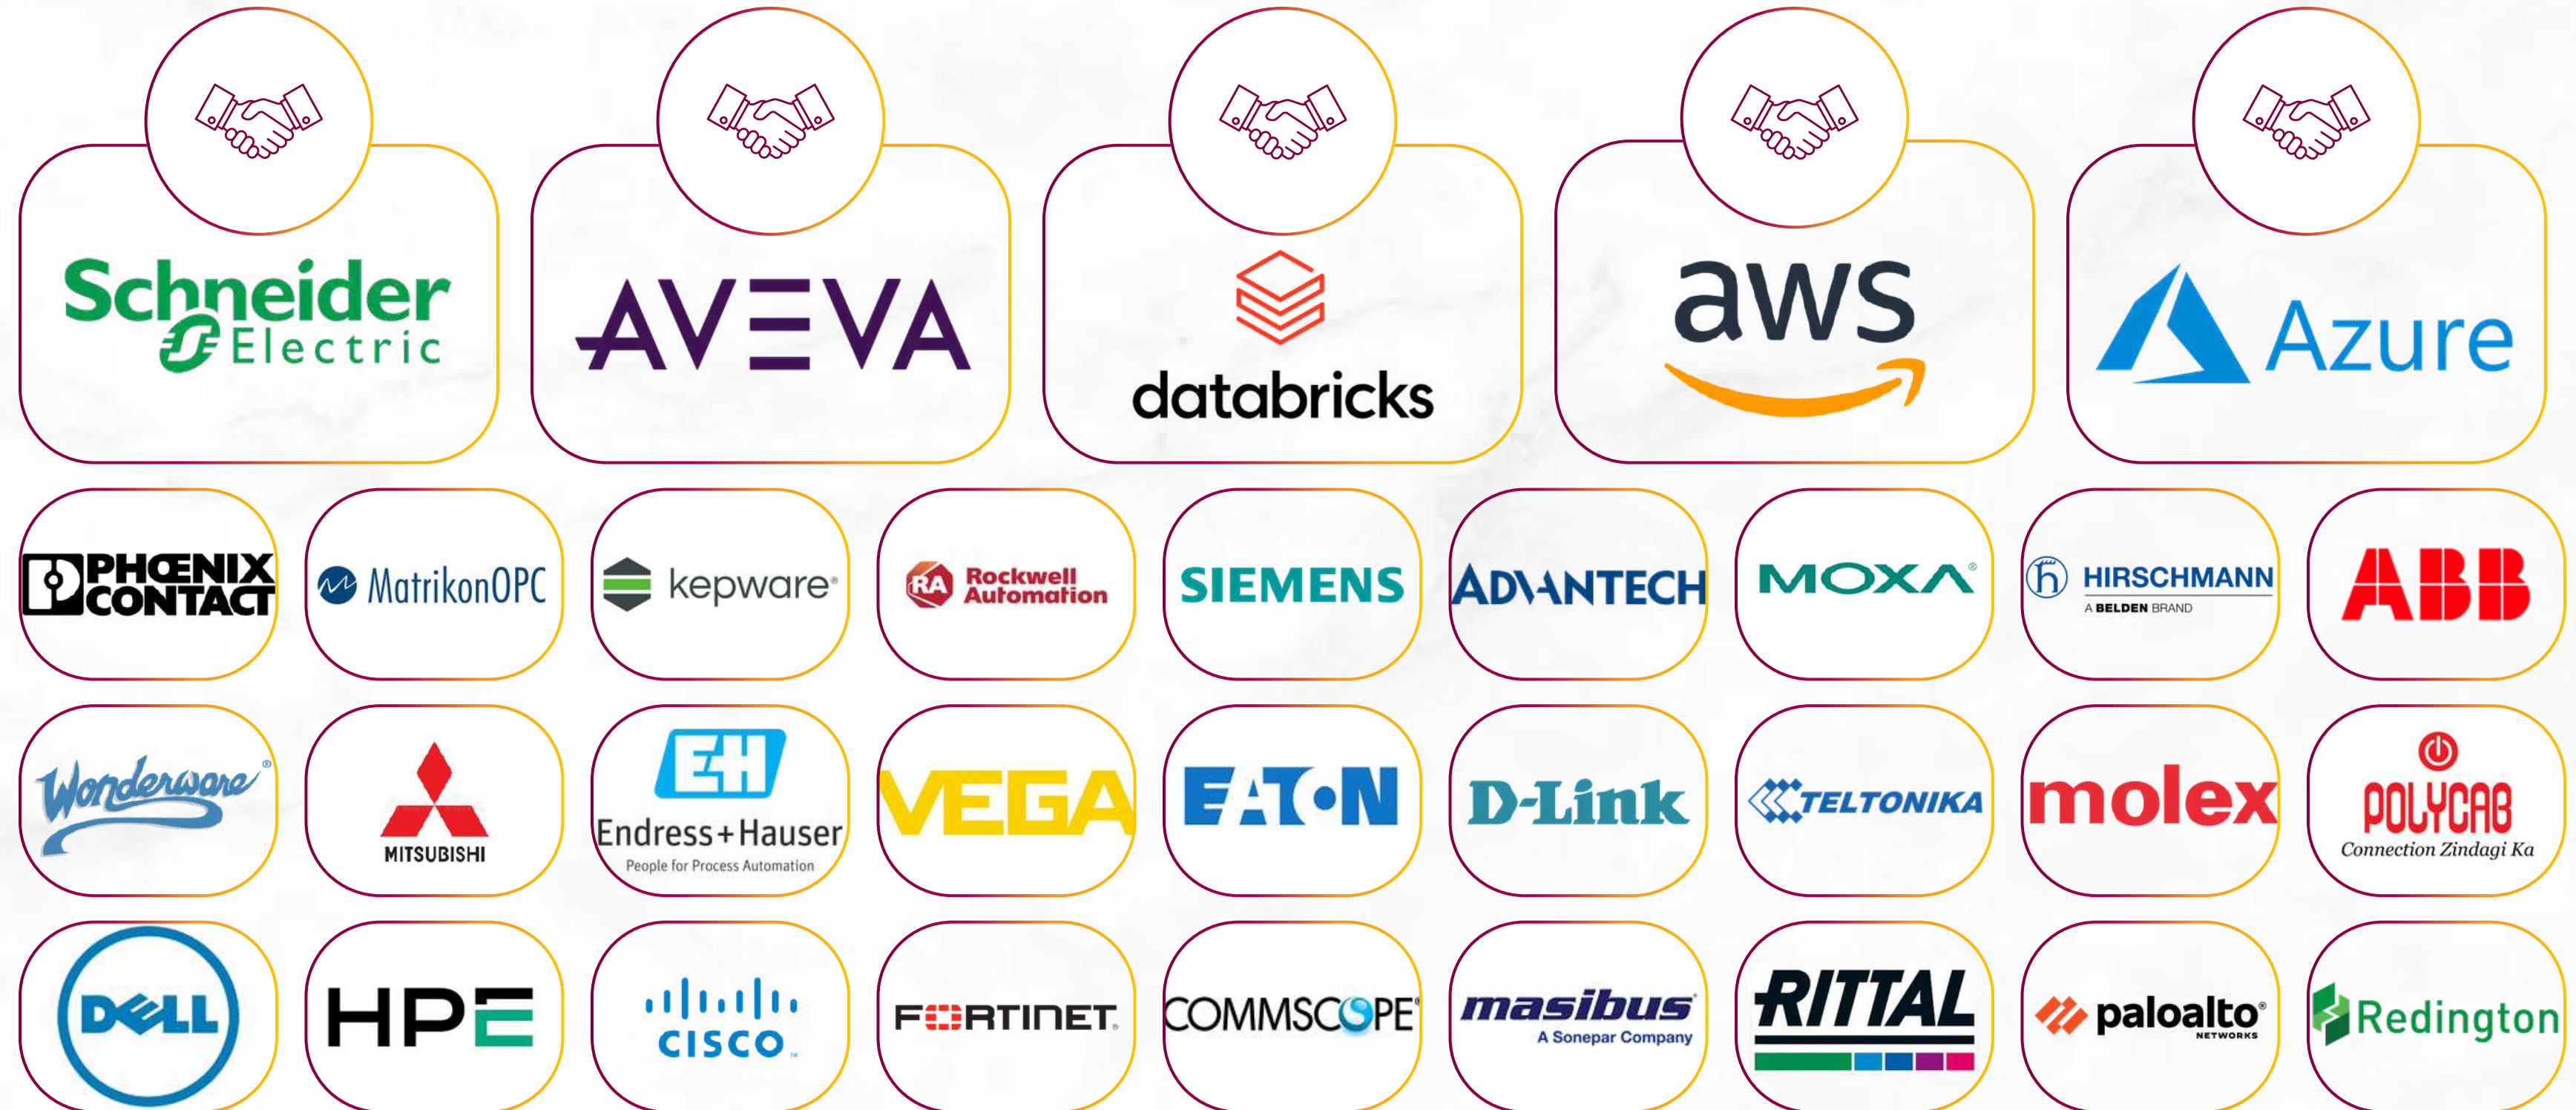

Safety & Compliance

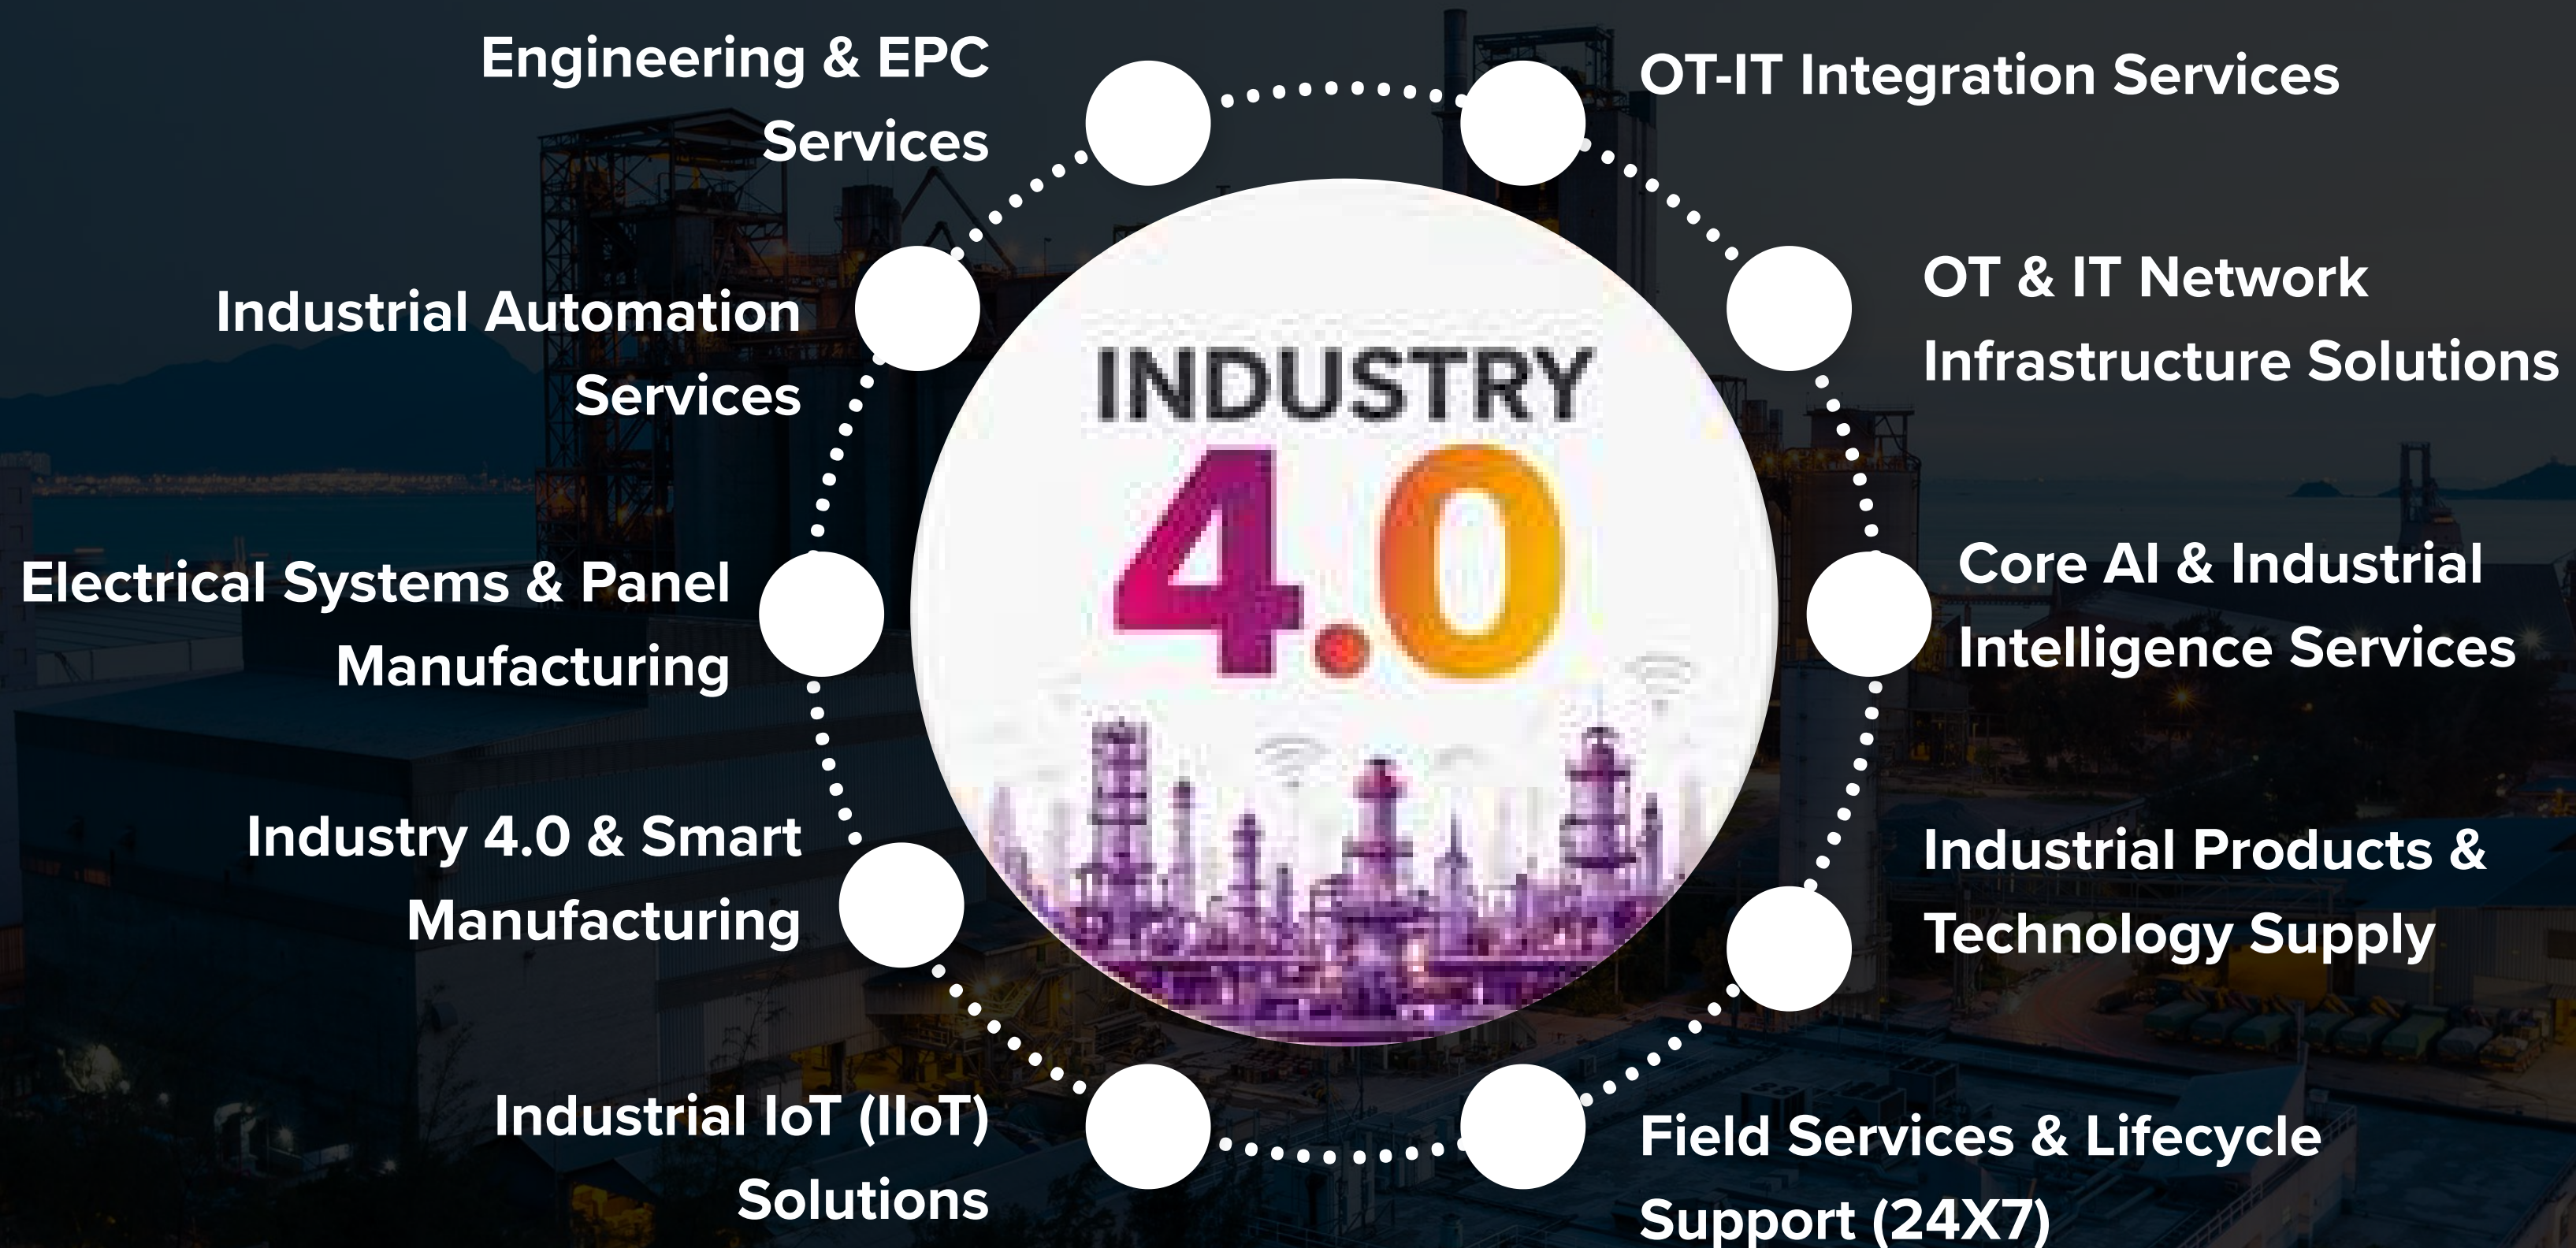

Long-Term Partnership

CORE OEM & PLATFORM PARTNERS

Products, Solutions & Services

Engineering & EPC Services

End-to-end multi-disciplinary design, engineering procurement, and site construction for modern industrial ecosystems.

Electrical Engineering

Mechanical Engineering

Process Engineering

Instrumentation Engineering

EPC Project Execution

Turnkey Industrial Projects

Testing & Commissioning

Site Installation Services

Industrial Automation Services

Enterprise logic controller programming, process optimization algorithms, and modern system architectures.

PLC Programming

DCS Solutions

SCADA Development

HMI Development

Process Automation

Batch Automation

Alarm Management

Industrial Control Systems

Plant Automation

Control System Migration

Electrical Systems & Panel Manufacturing

Enterprise logic controller programming, process optimization algorithms, and modern system architectures.

	PCC Panels		MCC Panels
	Intelligent MCC (iMCC)		APFC Panels
	VFD Panels		PLC Panels
	HMI Panels		Control Desks
	Bus Duct Systems		Power Distribution Systems

Industry 4.0 & Smart Manufacturing

Pioneering highly autonomous, flexible and predictive smart manufacturing infrastructures driven by operational data.

	Smart Factory Solutions		Manufacturing Intelligence
	OEE Monitoring		Real-Time Production Monitoring
	Predictive Maintenance		AI Dashboards
	Energy Monitoring Systems		Industrial Analytics
	Digital Operations Center		Asset Performance Monitoring

Industrial IoT (IIoT) Solutions

Translating telemetry seamlessly from field edge nodes directly into enterprise intelligence architectures.

	Machine Connectivity		Sensor Integration
	IIoT Gateway Deployment		Industrial Data Collection
	Remote Monitoring		Edge Computing
	Smart Device Integration		Protocol Conversion
	Cloud Connectivity		Integrated Control and Command Centre

OT-IT Integration Services

Unifying operations floor machinery databases directly with executive enterprise planning networks.

	MES Integration		ERP Integration
	Historian Integration		Industrial Data Collection(Date Lake)
	Enterprise Connectivity		Data Protocol Conversion
	Unified Operations Architecture		Industrial Database Integration
	Cloud Connectivity		Integrated Control and Command Centre

OT & IT Network Infrastructure Solutions

Architecting heavily segmented, highly redundant physical LAN/WAN systems certified for harsh industrial sites.

	OT & IT Network Architecture		Industrial LAN/WAN Infrastructure
	Fiber Network Infrastructure		Industrial Wi-Fi & Wireless Connectivity
	Secure Remote Access & Industrial VPN		OT Cybersecurity & Firewall Integration
	VLAN Segmentation & Industrial DMZ		Server, Data Center & Hybrid Infrastructure
	Redundant Network & Multi-Plant Connectivity		Network Monitoring & Diagnost

Delivering Secure, Intelligent & Future-Ready Industrial Connectivity Infrastructure

Core AI & Industrial Intelligence Services

Our Industrial Intelligence solutions enable organizations to improve operational efficiency, predict failures, optimize energy consumption, and accelerate smart manufacturing initiatives.

	Predictive Analytics		AI-Based Operational Intelligence
	KPI & Executive Dashboards		Production and Performance Analytics
	Energy & Utility Analytics		Alarm & Event Analytics
	Enterprise Reporting Systems		Industrial Visualization Platforms
	Asset Performance Intelligence		Smart Operations & Decision Support

AI-Powered Operational Intelligence for Smart Industrial Enterprises

Industrial Products & Technology Supply

Sourcing certified, genuine hardware architectures directly from authorized global industrial automation partners.
Delivering Reliable Industrial Hardware, Automation & Smart Infrastructure Solutions

	PLCs & Industrial Controllers		SCADA & Industrial Monitoring Systems
	VFDs, Drives & Motion Control		Industrial PCs & Edge Computing Devices
	Field Instruments & Process Instrumentation		Sensors, Transmitters & Smart Devices
	Industrial Networking & Connectivity Products		Industrial IoT (IIoT) Devices
	Electrical Components & Power Distribution		LV/MV Switchgear & Electrical Infrastructure

Empowering Industrial Enterprises with Reliable, Connected & Intelligent Technology Solutions

Field Services & Lifecycle Support (24X7)

Delivering Reliable, Continuous & High-Performance Industrial Operations. Ensuring near-zero unexpected operational downtime through targeted diagnostics, retrofitting, and preventative support plans.

	Installation Services		Commissioning Support
	Annual Maintenance Contracts (AMC)		Preventive Maintenance
	Breakdown & Emergency Support		Remote Technical Support
	System Upgradation & Modernization		Performance Optimization Services
	24x7 Managed Support Services		On-site Resources

Ensuring Operational Excellence Through Intelligent Industrial Support Services

Get in Touch

We're ready to support your journey towards smarter, connected, and future-ready solutions.
